Participants are expected to bring back the knowledge and skills that they obtained through the program so that it will eventually contribute for the social and economic development of their own countries. As a representative of each government, participants are obliged to practice the best of the program during the course and back to their home countries, and we are sure that each participant understands the importance of their role and this opportunity provided by JICA.

This guidebook is designed in order to provide every participant with necessary information to make their stay in Japan as fruitful as possible. We hope you a careful reading it in order to understand your stay in Japan and your responsibilities as a JICA participant. It also explains each step of your itinerary, and by following this guideline, we are confident that you will have all the necessary information for your pleasant journey. Please keep this guidebook with you.

On behalf of JICA, I hope that you will know more about our country and cultivate friendship with our people, as well as with other participants - meanwhile we will also have a great deal to learn from each of you. I. BACKGROUND INFORMATION FOR PARTICIPANTS

You will be traveling to Japan as a participant of JICA's Knowledge Co-Creation Program. It is important that you read the following information carefully to understand (1) what JICA is, (2) about JICA's Knowledge Co-Creation Program, and (3) your status as a JICA participant.

1. What is JICA?

Japan International Cooperation Agency (JICA), an incorporated administrative agency in charge of administering Japan's ODA, is one of the world's largest bilateral aid agencies supporting socioeconomic development in developing countries in different regions of the world.

2. JICA's Knowledge Co-Creation Program

Japan began its international cooperation in 1954, and "The Training Program in Japan" started in the same year by inviting sixteen participants from other parts of Asia.

Up to 2014, the term "training" had been used for the program, however, to inspire the program with "co-creating" approach of Japan, a new program title "The Knowledge Co-Creation Program" has been used from 2015. The term "co-creating" means the approach of building reciprocal relationships between Japan and the participating countries in which both sides learn from

each other and develop together.

The Knowledge Co-Creation Program remains an essential part of Japan's cooperation, and over past 60 years, more than 400,000 people have visited Japan from over 190 countries through the program. Recently, JICA hosts approximately 8,000 participants every year and this covers a whole range of areas such as governance, urban and regional development, health and medicine, education, environment management, peacebuilding and social security, natural resources and energy, disaster management and so on.

The objectives of JICA's Knowledge Co-Creation Program are: (1) to contribute to human resource development to address and solve target issues and challenges in developing countries, and (2) to contribute to the promotion of mutual understanding and friendship. The knowledge and expertise that the participants acquire in Japan strengthen societies and economies, and improve the lives of individuals in our partner countries. Furthermore, former participants with knowledge of and affinity for Japan bridge Japan and partner countries.

3. Status of Participants

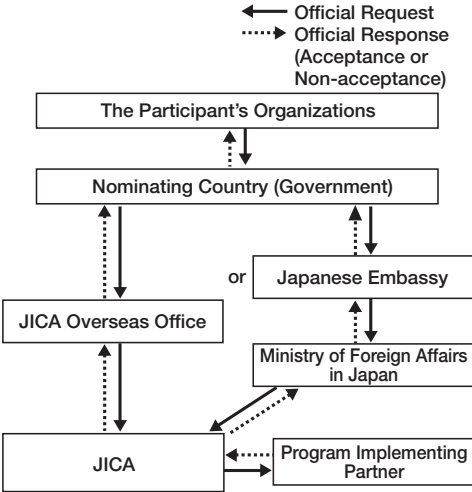

It is important for you to understand your legal status as a JICA participant while in Japan.

First and foremost, please keep in mind that you have been nominated by your government officially. Hence, the Japanese government designates you officially as a

"JICA participant," which in Japanese referred to as "JICA kenshu-in" (JICA研修員), and JICA becomes your guarantor by allowing you entering and residing in Japan legally for the duration of the designated course.

4. Participants Acceptance Process

Participants' acceptance in JICA's Knowledge Co-Creation Program is informed through diplomatic/official channels. The flowchart below describes the process of application submission and acceptance of the program.

II. REGULATIONS AND OBLIGATIONS

1. Participant : Rules and Regulations

The participants are requested:

- (1) to strictly observe the course schedule,
- (2) not to change the air ticket (and flight class and flight schedule arranged by JICA) and lodging by the participants themselves,
- (3) to understand that leaving Japan during the course period (to return to home country, etc.) is not allowed (except for programs longer than one year),
- (4) not to bring or invite any family members (except for programs longer than one year),
- (5) to carry out such instructions and abide by such conditions as may be stipulated by both the nominating Government and the Japanese Government in respect of the course,
- (6) to observe the rules and regulations of the program implementing partners to provide the program or establishments,
- (7) not to engage in political activities, or any form of employment for profit,

- (10) not to drive a car or motorbike, regardless of an international driving license possessed,

* Cannabis possession, narcotics and other illicit drugs usage

The possession, abuse and handover of drugs, and the aiding and abetting of these behaviors constitute “crimes.” Any and all drug-related behaviors are by no means approved by Japanese laws, and subject to strict punishment.

If you commit such criminal acts, you will be arrested and found guilty, which will result in reporting to the government of your home country and ruining your life.

The following are the main penalties for the drug abuse and drug-related behaviors.

Cannabis

- Import, export and cultivation . . . up to 7 years of imprisonment
- Possession, handover, receiving and use . . . up to 5 years of imprisonment

Even if you are just in possession of cannabis, it constitutes a crime.

Illegal cultivation of cannabis is also prohibited by law.

Stimulant drugs

- Import and production . . . finite term of not less than 1 year of imprisonment
- Possession, handover, receiving and use . . . up to 10 years of imprisonment

MDMA(3,4-methylenedioxy-N-methamphetamine)

- Import and production . . . between 1 year and 10 years of imprisonment
- Possession, handover, receiving and use . . . up to 7 years of imprisonment

Recently, cases of drug abuse including cannabis, MDMA and dangerous drugs have been increasing in Japan.

The abuse of drugs has serious, adverse impacts both physically and mentally, and might in some cases cause death.

You should never “be given,” “purchase” and/or “use” cannabis or other drugs. Furthermore, you should always bear in mind that a drug risk is nearby and don’t think, “Drugs are nothing to do with me.”

**Possession of guns and bullets

Japanese law prohibits the possession of guns and bullets. Should you have them in your possession, the police will arrest you. You would be guilty in principle and could be sentenced to imprisonment.

***Sexual Harassment

Sexual Harassment is defined as any unwanted comment or action of a sexual nature which make other feel uncomfortable, regardless of whether these comments or actions are directed at the recipient. Basically, even though unintended, whenever someone feels himself/herself to be harassed, such comments and actions may constitute sexual harassment. The point is how the recipient feels, not what the intention of offender is.

It is important, in order to avoid sexual harassment, to express your feelings and to understand the feelings of others. We all must be aware of our differing social and cultural backgrounds.

Japanese law bans sexual harassment, and JICA disapproves of such behavior in any form. In addition, sexual harassment cases might be reported to the government of the participant's home country.

The following show how to avoid committing sexual harassment.

- (i) Realize that people with different positions, gender or opinions react differently to sexual comments and behavior. Understand that people from different social, cultural, religious or generational backgrounds may also react differently to such behavior.
- (ii) Be aware that people will not always express their disapproval of your comments and/or behavior. It is wrong to assume that a person does not take offense to your comments and/or behavior just because he/she did not protest. Resisting or moving away from the person is also a way of saying 'No'.

The following are examples of comments and actions considered to be forms of sexual harassment. It should be remembered, however, that the customs of other countries might place acts not included among those listed below within the sphere of sexual harassment.

- (i) Exchange vulgar jokes
- (ii) Display of pornographic materials (such as poster of nude men or women)

- (iii) Purposely showing or reading aloud pornographic magazines or other material
- (iv) Persistently asking another for a date, to dine together, etc
- (v) Unnecessarily touching the body of another (It should be remembered that, although greetings such as kisses, hugs and putting a hand on the shoulder are normal in some countries, they might be taken as sexual harassment in Japan)
- (vi) Insistence on a sexual relationship with another.

Reference video: “Preventing Sexual Harassment Resulting from Differences in Culture and Customs”

The video contains some examples and points to note about sexual harassment which might result from differences in culture and customs of your country and Japan. All participants are requested to watch this video before coming to Japan.

The video is translated into 15 languages (11 of which only the captions are translated), and all of them are available to watch in the JICA-VAN system.

- Full version (4 languages):
English, French, Spanish, Portuguese
- Caption translated version (11 languages):
Russian, Arabic, Vietnamese, Thai, Indonesian, Cambodian, Lao, Mongolian, Nepali, Serbian, Turkish

****Shoplifting

Japanese law bans crimes such as shoplifting and JICA also disapproves of those crimes committed by participants.

Keep in mind that such behavior bring JICA and your country into disrepute and it will be reported to the government of your country.

It is important to be aware it will be considered as shoplifting if you bring out goods from the shop before the payment. Be aware that your behavior in shops is always monitored by security camera and plain-clothes security agent.

2. JICA Centers : Rules and Regulations

For a comfortable stay at JICA Centers, you are requested to observe the following rules and regulations.

- (1) Return to the JICA Center before 11:00p.m (the closing time depends on the Center), If you are unable to return in time, call the JICA Center as soon as possible to let them know where you are and your estimated time of return.
- (2) Stay out overnight: If you stay out overnight for private reasons, you are required to inform in advance by submitting a Stay-out Application form to the Front Desk.
- (3) Fire Prevention: The use of electric heaters, stoves, toasters or any kind of heating appliance is prohibited for the prevention of fire. Smoking in

bed and cooking in your room are strictly forbidden. (Participants of long-term program are required to follow rules and regulations at their accommodations that are established specifically for participants of long-term program.)

- (4) JICA has drawn up "Environmental Policy" as a measure for environmental protection. Each participant needs to understand JICA's environmental policy and activity and perform energy saving and separate garbage according to the rules of JICA Centers.

Note: Please refer to accessible URL of respective centers for more information, such as map, facilities and services.

3. Reports and Materials (Submission of Reports) **(*Short-term participants ONLY)**

- (1) Before Coming to Japan

Participants in the Group and Region Focus (GRF) program are required to prepare a report and other materials as described in the GI (General Information), and submit them to the JICA overseas office or the Embassy of Japan before coming to Japan.

If you plan to study and experiment using data and samples from your own country during your stay in Japan in order to study regarding the current situation in your fields, you should be sure to prepare and collect the necessary data and samples to take with you on the trip

to Japan.

(2) After Arriving in Japan

In accordance with the instructions which may be prescribed by JICA or the participant's program implementing partner, you will be required to prepare and submit reports, answer an evaluation questionnaire, and prepare other documents.

4. Copyright Act

JICA participants are required to pay particular attention to the following items.

- (1) Anyone caught downloading pirated music or images will face up to two years in prison, a maximum fine of 2 million Yen or both.
- (2) Copying discs with copy protection or ripping them to a hard drive is illegal.
- (3) Using of any software or device that avoids a disc's protection methods is also illegal.
- (4) Making copy of movie and video game become illegal in Japan even if for the purpose of personal use.

5. Health Requirements

You are expected to be in good health, both physically and mentally, so as to complete the courses. All of the nominees are advised to have a physical check-up before coming to Japan. You are also requested to record your health status on the medical history form

and to attach a medical information letter from your doctor (preferably, printed in English) that describes the current status of your illness and the permission to visit Japan.

Also the participants who are scheduled to stay more than six months will undergo a detailed health check upon their arrival in Japan. In case the medical examinations disclose any serious illness or unfavorable health conditions, early termination of their course will be recommended. (Please see page 27 for IV. MEDICAL SERVICES)

You are expected to maintain your good health throughout your stay in Japan, however JICA pays a premium for you to obtain medical insurance to reduce the burden of emergency medical expenses. Since pre-existent illness, dental treatment, and pregnancy related care are not covered by the insurance (See page 27 for details), those who have chronic diseases, are strongly suggested: to consult one's doctor before departure, to carry sufficient quantities of a prescription medicine for the length of your stay in Japan, and the medical records including proof of need. (The maximum amount of medicine you can bring into Japan for personal use is equivalent to one month's supply, and you should ensure by below website that the medicine to be brought in is not prohibited nor restricted in Japan. If you need to bring more than the restricted quantity of medication into Japan, you need to apply for a so-called "Yunyu

Kakunin-sho”, a kind of import certificate to the Regional Bureau of Health and Welfare in advance. In this case, please contact the contact number in the following website.

https://impconf.mhlw.go.jp/about_en.htm

Moreover, JICA Centers have no medicines that can be provided to you, so please bring some medicines you need from your country when coming to Japan, such as stomach medicines and pain reliever as well as for prescription. You cannot purchase medicines without prescription in most cases.

Stress connected with living in a foreign country might be a factor that worsens your health status. That can result in failure to complete courses and added medical bills.

Staying in good health is your own responsibility.

(1) Economy Class Syndrome

When the movement of the legs is reduced for long period of time blood clot may be formed. Such blood clots in your veins may travel through your bloodstream and lodge in your lungs, blocking blood flow. This is how Economy Class Syndrome develops and this may results fatal condition.

(2) To prevent Economy Class Syndrome

- exercise
- hydrate
- deep breathe
- avoid tight clothing

6. Termination of Program

Please be aware that your status as a JICA participant is subject to termination in the event that:

- (1) you fail to observe the aforementioned regulations,
- (2) you fail to maintain a satisfactory level of performance, or
- (3) you fail to observe Japanese laws and ordinances during your stay.

You are expected to behave as a representative of your government, country, and people while you are in Japan.

III. ALLOWANCES

Allowances outlined in the JICA regulations are Living Allowance, Accommodation Allowance, Transportation and Commutation Allowances, and Supplementary Allowances (Outfit Allowance and Stop-Over Allowance).

(Please note that the allowance for participants of long-term program differs; therefore, some parts of the following explanation may not be applicable. For details, see “Handbook for JICA Long-term Participants” which will be provided upon arrival in Japan.)

(2) Accommodation Allowance

Basically, you are required to stay at a designated JICA Center. However, depending on the occupancy situation of the Center, you may be required to stay at a non-JICA accommodation facility (normally,

either a local hotel arranged by JICA or other hostel). In this case, JICA will pay your room charge to the hotel through the travel agency. In some cases, however, accommodation allowance will be paid to you, and you must pay the room charge by yourself. See Table 1 for further details.

Therefore, you shall be responsible for paying any cost for treatment of said medical conditions. 1. Medical Card

- (1) You will be automatically covered by insurance arranged by JICA. A Medical Card, certifying that you have medical insurance, will be given to you at the JICA briefing session. This card is to be used for necessary medical treatment during your stay. Medical expenses will be covered in accordance with the provisions of the medical insurance.

(2) Non-Emergency Medical Care

See a health staff at a JICA Center or any other lodging facility who works cooperatively with local community hospitals. If necessary, he/she will arrange further and specialized treatment. If, for some reason, a health staff is not available at your lodging facility, contact any of the JICA staff or Coordinator.

3. Examination upon Arrival

Along with an increase in the number of JICA participants, there has been a subsequent increase in the number of participants who suffer from serious illnesses such as kidney failure, tuberculosis and liver complications during their stay in Japan. Some of these participants may have to be hospitalized for long periods and some have to terminate their course before completion. A golden opportunity is thus lost.

In order to avoid this sort of circumstance from arising for both participants and JICA, those participants who will be in Japan in excess of six months are requested to undergo a medical examination upon their arrival in Japan.

The participants stay in Japan for 3 months or longer have to undergo an X-ray examination.

The participants stay in Japan for a month or longer on the program in medical institutions also have to undergo an X-ray examination.

The participants other than those mentioned above may undergo the medical examination due to their courses subjects.

² Entry Visa for Japan or Transit Country:

(1) Visas for Japan:

You must obtain an entry visa to Japan that indicates status as a JICA participant (visa for "Trainee visa") or JICA scholar (visa for "student visa"), regardless of the duration of the designated course, and even if citizens of your country are exempt from obtaining tourist visas.

You must check if your status for visa is correct as soon as visa is issued.

Your visa as a JICA participant will be issued by the diplomatic mission of the Embassy or Consulate of Japan nearest you. If there is no Japanese diplomatic mission in your country, you will have to stay over in a transit country for as long as it takes to receive the visa (probably more than one day).
